2010 Kemeny Undergraduate Lecture
The Search for Randomness

PERSI DIACONIS
Mary V. Sunseri Professor of Statistics and Mathematics, Stanford University

Monday, February 22, 2010
7:00 – 8:00 PM
008 Kemeny

ABSTRACT: I will take a careful look at some of our most primitive images of random phenomena; tossing a coin, shuffling cards and throwing a dart at the wall. Analysis and practical experiments show that, while approximate randomness is possible, usually we are lazy and things are quite far from random. This reflects on the use (and misuse) of "statistical models" and the basic philosophy of randomness.

Everybody Welcome!
