Business Analyst Intern at McKinsey & Co.

Summer 2024

With the help of my Byrne funds, I worked as a business analyst intern for a strategy consultant in Denver, Colorado. Throughout the internship, it was exciting to apply my quantitative skills in cost analyses as well as develop my client-facing soft skills as we worked for a large trucking company. I was able to combine my knowledge of statistics and linear algebra to improve revenue streams and equipment efficiency. It was fulfilling to learn the ins and outs of how a large company runs and the nuances to every decision made. As a computer science major, this internship was the great culmination of my academic experience, helping my team improve our client's business structure and learning about the world of packaged goods.
