

# Microarray and Bioinformatics Based Disease Classification

Steven A. Greenberg, MD

Brigham and Women's Hospital, Harvard Medical School

Thursday, May 22, 2003

102 Bradley Hall, 4:00 pm  
(Tea 3:30 pm Math Lounge)

## **Abstract**

Highly parallel and automated analyses of biological samples provide new opportunities for the understanding of disease pathophysiology and classification. This talk will focus on the medical application of microarrays and bioinformatics for disease diagnosis, prognosis, and treatment.
