ERRATA:
RIGOROUS COMPUTATION OF THE ENDOMORPHISM RING
OF A JACOBIAN

EDGAR COSTA, NICOLAS MASCOT, JEROEN SIJSLING, AND JOHN VOIGHT

This note gives some errata for the article Rigorous computation of the endomorphism ring of a Jacobian [1].

(1) §1.2, third paragraph: Our approach is similar to work of Couveignes–Ezome [2, §6.2], who also formally solve a differential system to compute equations for an isogeny between curves of genus 2. Thanks to Damien Robert for providing this reference.

(2) Before (8.2.4), the elliptic curve is $Y: y^2 = x^3 + (6656/3)x - 185344/27$ (the $y^2$ is missing), and in (8.2.4) it should be $\mapsto$.
