

Math 113 Spring 2020 Homework 0

INSTRUCTIONS: Please write your responses on a separate sheet of paper and clearly label each response.

1. Please tell me a bit about your analysis background. For example, which Dartmouth courses have you taken? What courses have you taken elsewhere and what did they cover? In particular, what multivariable calculus have you had?
2. What are you hoping to get out of this course? “I’m only here because I have to take a classroom course and this was the best option” is an acceptable but disappointing answer. Of course, I am hoping for more.
3. What is your attitude towards analysis? Again, “I hope to never had to take or teach an analysis course again” is acceptable. But so is, “I hope to work in analysis someday”.
4. If you are willing, tell me something interesting about yourself. For example, I came to Dartmouth in the fall of 1985. For a time, I was interested in underwater photography, but I can’t dive anymore so I’ve moved on to photos above water.
