

Math 36 — Daily Homework  
Assigned: 10/11  
Due: 10/13

1. Write up a description of your final project.

If you are going to model a real-life situation, you should include the following:

- Your partner's name, if you have a partner
- The scenario you are modeling
- The tools we've learned in class that you will use (i.e. game theory, networks, etc.)
- The questions you will be trying to answer with your model

If you will be studying a particular mathematical technique in more detail, include

- Your partner's name, if you have a partner
- The mathematical topic you want to study
- The names of one or two references and the authors. These could be textbooks about the thing you want to study, or published papers that use the techniques you want to learn.
