Math 36 — Daily Homework
Assigned: 10/25
Due: 10/27

1. Consider the following asymmetric game:

		Player 2		
		D	E	F
Player 1	A	$(0,0)$	$(0,0)$	$(1,1)$
	B	$(3,3)$	$(0,0)$	$(0,0)$
	C	$(0,0)$	$(2,2)$	$(0,0)$

Identify all the Nash equilibria for this game. You do not need to show your work checking all 49 possible combinations of mixed strategies. I only need to see work for the combinations that actually have Nash equilibria.
